

src/plottingwidget.h

```
graph TD; A[src/plottingwidget.h] --> B[QWidget]; A --> C[QListWidget];
```

The diagram illustrates a header file, `src/plottingwidget.h`, which serves as a base for two widget classes. Two blue arrows originate from the bottom of the `src/plottingwidget.h` box and point to the `QWidget` and `QListWidget` boxes, indicating that both classes inherit from or are defined in terms of the plotting widget header.

QWidget

QListWidget
